

Environmental Student Projects

Call for **Service-Learning Projects** to Support the *IEEE Initiative to Address Climate Change*

IEEE recognizes that climate change is a global crisis and is committed to helping combat and mitigate the effects of climate change through pragmatic and accessible technical solutions and by providing engineers and technologists with a neutral space for discussion and action—climate-change.ieee.org.

EPICS in IEEE is supporting this initiative by offering students the opportunity to address the local environmental and climate change technological needs in their communities. Through their service-learning projects, the students will also develop critical knowledge and skills to help them succeed in their future engineering careers.

Selected projects will receive up to \$10,000 USD, mentorship, and resources.

Benefits of being an EPICS in IEEE Partner

**Member
Community
Engagement**

**Infrastructure for
Selecting and
Supporting Projects**

**Connect and Mentor
Engineering
Students**

Ready to partner?

Partner with us

Fund Projects

- Support prototyping and other materials for student teams
- Support the administration costs and storytelling for the teams involved

Share Call for Proposals

- Encourage students and volunteers to submit proposals

Provide Industry Mentors

- Help ensure the success of the projects by providing industry mentors

Share Project Stories

- Spread the word about the wonderful work the teams are doing

Important dates

Accepting Proposals

1 September-1 November 2023

Proposals Selected

December 2023

Funding Distributed

January 2024

Project Completion

December 2024
