

Environmental Student Projects

Call for **Service-Learning Projects** to Support the *IEEE Initiative to Address Climate Change*

IEEE recognizes that climate change is a global crisis and is committed to helping combat and mitigate the effects of climate change through pragmatic and accessible technical solutions and by providing engineers and technologists with a neutral space for discussion and action—climate-change.ieee.org.

EPICS in IEEE is supporting this initiative by offering students the opportunity to address the local environmental and climate change technological needs in their communities. Through their service-learning projects, the students will also develop critical knowledge and skills to help them succeed in their future engineering careers.

Selected projects will receive up to **\$10,000 USD**, mentorship, and resources.

This collaboration helps students understand

Community Concerns

The Value of Teamwork

Communication Strategies

Have any Questions?

Email us at epicsinsieee@ieee.org

Submit your Proposal

Service learning proposals must:

- Include a non-profit partner
- Identify a community problem
- Describe an engineering solution
- Contain an itemized budget
- Outline an assessment plan

Check out the Call for Proposals on the EPICS in IEEE Website for more details!

Important dates

Accepting Proposals

1 September-1 November 2023

Proposals Selected

December 2023

Funding Distributed

January 2024

Project Completion

December 2024
