

Call for Service Learning Projects

Design, build, and deploy sustainable solutions to solve local community challenges.

Students, faculty, and professionals will have the opportunity to address the technological needs of communities. Proposals should identify a problem in the local community, and detail how the student team will attempt to solve the problem using engineering and technology skills.

The projects should be able to be completed in one year or less. All projects must work with a non-profit community partner and have IEEE members involved. We encourage teams to partner with local IEEE sections, chapters, and affinity groups as well as IEEE student branches for projects.

Selected projects will receive up to **\$10,000 USD**, mentorship, and resources.

ACCEPTING PROPOSALS:
1 March 2025 – 1 May 2025

Check out the [Call for Proposal webpage](#) for more information.
